- Metal Raw Materials: Supply of metal raw materials to manufacturing companies, mainly Titanium, Copper, Stainless Steel and Aluminum.

RENEWABLE ENERGY & BACKUP SOLUTIONS

(SOLAR POWER SYSTEM, INVERTER POWER
SYSTEM & SOLAR STREET LIGHTS)

It is understandable how epileptic power can be a menace to anyone including businesses in Nigeria where unstable power is a daily occurrence. Erratic power outages affect businesses negatively resulting in loss of productive hours while operating a standalone generator for your power need is expensive and in many cases a waste of finances.

Renewable Energy & Backup Solutions

Energy security and efficiency can be cheaper with the help of an energy expert who will assess your energy need and proffer a cost-effective alternative backup power solution. DeepWells Energy is your choice for quality & efficient power solutions, we have helped many businesses save money and increase their productivity with our solutions. Our power solutions are as follow:

Residential Back-up Solutions: Our solar & inverterpower systems can be sized to fit your individual needs. Whether you are looking only to power essentials or you want a whole house application we can help. For our residential customers, we design and install inverter & battery solutions for homes or solar power solutions as off-grid or On-grid for homes.

Renewable Energy & Backup Solutions

Commercial Back-up Solutions: Our solar & power systems can be sized to fit your business needs. Power outages means downtime. Downtime means lost re-venue! We can proffer a solution that will meet your needs. Our commercial solar & inverter backup solutions can be sized to meet any business needs. For our business customers, we design and install solar & inverter backup solutions for offices and critical equipment's such as Datacentres, ATM machines, Hospital equipment's, Servers, Telecoms Base transmission stations (BTS).

Renewable Energy & Backup Solutions

Solar Street Lights: Deepwells Energy provides solar street light solutions for residential, commercial & industrial projects. Days of environmental blackout is rolling out gradually, it has the advantages of stability, long service life, simple installation, safety, great performance and energy conservation.

Energy And Power Audit: We recommend and offer energy and power audit to clients as a business cost-saving measure and avoidance of unnecessary energy consumption. It is always advised to consume energy reasonably and efficiently that is, as it is needed. Power audit aids in letting you have an overall idea of what you are consuming, your actual energy demand and gaps in the electrical installation with recommendations for electrical protection and growth.

Renewable Energy & Backup Solutions

Engineering, Procurement & Construction

Deepwells Energy provides quality services for most industrial projects. Our broad capability enables us provide seamless integration of engineering, procurement and construction services throughout all phases of a project. We pride ourselves on our ability to provide the highest level of engineering, procurement, construction, installation and commissioning services to clients for their complex project investments.
